SUMMARY

Creative web developer with experience in structuring, developing, and implementing interactive websites and native mobile applications. Ability to leverage technical and analytical skills to solve complex problems.

TECHNICAL SKILLS

Python, Django, SQL, APIs, CSS and HTML/HTML5, JavaScript/AJAX, jQuery, Vue.js, Object-Oriented Programming, Postgresql, Postgis, Leaflet, Esri/Arcgis, Version Control, Tachyons, and Bootstrap

PROJECTS

getJustice

- Built Chrome Extension and Web App using Django, JavaScript, CSS, HTML to allow users to report civil rights violations that were posted on social media to government officials & civil rights groups.

Map Finder

- Used Python, Django, Postgis, Leaflet, and Esri to create a web application where users can view data on a map, select the data set they would like to display, and search for any location on the map with zoom capability. Data included satellite imagery, topographic information, and soil quality metrics.

Elevation Mapping

- Used object-oriented programming and Python to build a program that reads elevation data and draws corresponding maps of various sizes as a .png file.

Django Interactive Webpage of Links:

- Created an interactive Django web app using Python, HTML and CSS. Allowed users to register or login, submit a post, comment on other posts, vote on posts, and edit or delete any of their submissions.
