Tiana Horn

SOFTWARE ENGINEER

Engineering Focus: Backend Engineering • APIs • Data Systems • Cloud Applications

Software engineer with experience designing and building production applications across government compliance, social impact platforms, and e-commerce systems. Strong background in Python, Java, JavaScript, React, and SQL, with expertise in front-end development, backend architecture, REST API development, relational database design, and data-driven applications. Entrepreneurial engineer who has architected and launched multiple platforms from the ground up and continuously explores new languages, frameworks, and cloud technologies across multiple industries.

Professional Experience

favored.digital LLC, ***Lead Web Developer and Founder,*** Remote — Sept 1 2025-Present

- **Agentic Specifications Writer:** Designed and built SpecPilot, a multi-agent system that autonomously drafts government (UFGS) construction specifications by orchestrating 6 specialized agents (drafting, compliance validation, cross-document coordination) via Cloudflare Workflows and Durable Objects, with RAG-grounded generation over real federal specification corpora.
- **Web Development & Consulting :** Creating digital experiences that not only look exceptional but also drive real results for clients ranging from a college president emeritus to personal brands and businesses.

Technologies: Claude Code, Typescript, NextJS, Vite, Python, Django, Cloudflare Workflows and Durable Objects

Color of Change, ***Full Stack Software Engineer,*** Remote — Apr 26 2022 - Dec 24 2024

- **Accessibility debugging:** Identified and resolved issues affecting donor email accessibility and communication workflows.
- **REST APIs & database architecture:** Designed and implemented core services supporting a campaign management platform used for national advocacy initiatives. Built API endpoints and relational schemas including extensive documentation.
- **Full stack feature delivery:** Integrated backend APIs with Next.js frontend applications to power user-facing features such as user mentions, activity tracking, in-app notifications, and campaign reporting and management.
- **Form Field Protection:** Built form fields that protect against nested SQL injections and dynamically update source codes.
- **Testing automation:** Implemented unit tests and end to end tests for both the frontend and backend code bases.
- **React framework:** Wrote custom hooks and utilized React state and Chrome Dev Tools to ship and debug code.
- **Authentication & permissions systems:** Implemented Okta authentication, notifications, and activity tracking features.
- **Cloud data ingestion pipelines:** Built bulk data upload workflows from AWS S3 into Amazon RDS databases.

Technologies: Python, Django, JavaScript, Next.js, React, PostgreSQL, AWS S3, Amazon RDS, Git

Flower Child Remedies, Inc., ***CEO/CTO and Cofounder,*** Remote — Aug 15 2015- Apr 26 2022

- **Python/Django SaaS platform:** Architected and built a full-stack e-commerce system using PostgreSQL databases and AWS cloud infrastructure.
- **JavaScript/Stripe integration:** Implemented systems for payments and checkout workflows using JavaScript and the Stripe API.
- **Personalization algorithm:** Developed a data-driven algorithm generating customized product formulas from structured ingredient and user data. Used bootstrap carousel to dynamically show survey sections to end-users.
- **Database design:** Modeled relational schemas supporting ingredient metadata, behavioral attributes, and formulation logic.
- **End-to-end system ownership:** Led architecture, development, testing, deployment, & performance optimization of the platform.

Technologies: JavaScript, Stripe API, Python, Django, PostgreSQL, AWS, HTML, CSS

ArchiveSocial, Inc. ***Associate Software Engineer*****,** Durham, NC — Dec 1 2019 - Oct 21 2020
ArchiveSocial, Inc. ***Software Engineering Intern,*** Durham, NC — July 15 2019 - Nov 30 2019

- **Government compliance platform:** Developed backend and frontend features for a compliance focused platform archiving social media records for local, state, and federal government agencies including the White House.
- **MySQL data queries:** Wrote and optimized MySQL queries on databases with over one million records.

Technologies: Java, JavaScript, MySQL, REST APIs, Git

Volunteer

Durham County Transportation Advisory Board, ***Board Member,*** Durham, NC — Nov 2018 - Nov 2021

- Appointed by the Durham County Board of Commissioners to serve on board tasked with advocating for community transportation needs.
